Zulu UC Features

Zulu Desktop

Make and receive phone calls from your extension while away from the office!

- » Dial contacts by name using directory
- » Send / receive SMS and fax
- » Presence control
- » Chat messaging for team collaboration
- » File Sharing
- » Visual Voicemail

Zulu Mobile

Take your phone extension with you with Zulu Mobile for iOS and Android devices!

- » Make and receive phone calls with colleagues and your customers as if you were sitting at your desk
- » Dial-by-contact name
- » Visual Voicemail
- » Full integration with your iOS or Android device's native calling app for intuitive functionality
- » Automatic low power mode when not in use

Chat

Integrated Chat functionality means staff members can communicate more effectively with each other, with features like 1-to-1 messaging and group chat.

Presence

View and set presence status to help communicate with your staff members your availability. Presence updates are updated across all your endpoint devices too!

Click-to-Call

Users can instantly call any phone number that is seen on a web browser or MS Outlook client. Simply click on the phone number and Zulu will initiate an outbound call via the desktop client or your desk phone.

Call Pop

Ideal for CRM and Help Desk Integration, Call Pop will automatically open your desktop web browser on an inbound call with all the information of the caller.
